Rescuers Of Cypress: Learning From Disaster

Rescuers of Cypress - Cynthia M. Stuhlmiller 1996-01-01
A response to existential negativity analyzing the heroic acts of rescue workers who saved lives and retrieved bodies from the Interstate-880 Cypress Street viaduct following the 1989 Loma Prieta earthquake. Stuhlmiller (U. of Tromso, Norway) presents the workers' reactions in their own words, pinning their experiences to a transactional framework which allows her to discuss the moral obligations of their heroism and the wider role of commitment to community that modern philosophers often disregard. Annotation copyright by Book News, Inc., Portland, OR

The Emotional Nature of Qualitative Research - Kathleen Gilbert 2000-09-28
This book focuses on the place and purpose of emotions in the research process, and explores the appropriate boundaries. Designed to explore how to manage the emotional content of research, the text service as a supplemental to qualitative research method courses, and is an excellent reference for the professional as well.

Interpretive Phenomenology in Health Care Research - Garrett K. Chan 2010
"Divided into two parts. Part 1 explores IP from a theoretical and philosophical perspective and addresses methodology issues. Part 2 consists of examples of IP studies that address a wide range of research questions so that readers can more easily integrate IP in their research practice." Patricia Benner, a recognized expert on IP, comments on selected chapters.

Transforming the Future of Learning with Educational Research - Askell-Williams, Helen 2015-01-31
The field of education is a vital component of today’s society, enriching and facilitating the attainment of new knowledge. Progress continues to be achieved in this area as new methods...
are envisioned that increase education’s value. Transforming the Future of Learning with Educational Research brings together diverse perspectives that underscore the importance of research practices toward the enrichment of teaching. Highlighting themes of learning, diversity, education communities, and student wellbeing, this book is an essential reference source for teacher educators, researchers, teaching practitioners, and professionals interested in the value of research within the field of education.

**Stress and Emotion**- Richard S. Lazarus, PhD 2006-05-04 This volume is a sequel to the landmark work that established an exciting new field of study, Stress, Appraisal and Coping (Lazarus and Folkman, 1984). The author now explores the newest trends in research and theory, focusing on the rationale for a cognitive-mediated approach to stress and emotions. He makes clear distinctions between social stress, physiological stress, and psychological stress. By integrating both stress and emotion into one theoretical framework, with appraisal and coping as its basis, this book takes a narrative approach to both theory and research. Lazarus concludes with a look at stress and health, with a specific focus on new developments in infectious diseases, the role of the nervous system, and his view of recent changes in psychotherapy. For all upper division psychology majors, graduate students, academics, and professionals in related fields.

**Early Childhood Development: Concepts, Methodologies, Tools, and Applications**- Management Association, Information Resources 2018-12-07 A focus on the developmental progress of children before the age of eight helps to inform their future successes, including their personality, social behavior, and intellectual capacity. However, it is difficult for experts to pinpoint best learning and parenting practices for young children. Early Childhood Development: Concepts, Methodologies, Tools, and Applications is an innovative reference source for the latest research on the cognitive, socio-emotional, physical, and linguistic development of children in settings such as homes, community-based centers, health facilities, and school. Highlighting a range of topics such as cognitive development, parental involvement, and school readiness, this multi-volume book is designed for educators, healthcare professionals, parents, academicians, and researchers interested in all aspects of early childhood development.

"Understanding Loss and Managing Change"- 1995

**Mental Health Services in Disasters**- Raquel E. Cohen 2000 This Instructor's Guide complements Mental Health Services in Disasters: Manual for Humanitarian Workers. It serves as an instrument for the creation and execution of training courses and programmes on the subject. The Instructor's Guide is designed to be flexible and easily translated. It can be adapted to the customs of different countries or regions. The goal is to have a well-prepared and trained relief work force to respond efficiently and thereby contribute to reducing the social and psychological consequences from any disaster.

**Bibliographic Index**- 1997
The Life and Work of an Eminent Psychologist-Richard S. Lazarus 1998-04-15 This book is an intellectual and personal history of Richard Lazarus, a psychologist whose pioneering research and theories in stress, coping, and emotion continue to have a worldwide influence. The author interweaves the account of his personal life and career with the developments of psychology as an academic discipline during the past five decades. His reminiscences offer glimpses of academic life, university politics, and also his growing contacts with the European and Japanese colleagues who invited him to lecture. The book concludes with his thoughts about aging, retirement, and issues of life and death. -- Publisher description

A Descriptive Analysis of Antecedents of Risk Based Decision Making in Firefighting-Alan G. Gomez 2008 Examines the distribution of firefighter's personal characteristics, antecedents of their decision making strategies as well as firefighting personnel's perceptions of the risks inherent in their jobs.

Interpersonal Nursing for Mental Health-Jan Horsfall 2001

Man's Best Friends - True Stories of the World's Most Heroic Dogs- John McShane 2012-07-27
For thousands of years, men and women have known who to turn to in times of trouble - a dog. All over the world dogs have risked, and often lost, their lives to look after the human beings they care for. Their intelligence, devotion and astonishing courage to help humans in distress on countless occasions almost defies belief. Their stories range from Roselle the Labrador, who led her blind owner to safety from the carnage of the World Trade Centre, to the legends of Balto and Togo, two of the huskies who traversed over 1,000 kilometres of snow and ice to bring life-saving medicine to an isolated town, and Swansea Jack, the black Labrador who rescued almost 30 people from drowning and who had a statue erected in his honour. Many of the dogs featured in this book have been specially trained to help humans, a task they eagerly set about regardless of the physical risk they face as a result. Then there are the family pets who, when danger threatens, react with total disregard for their own wellbeing, caring only about one thing; protecting the humans they love.

Rescuers Of Cypress: Learning From Disaster

Practical Lessons from the Loma Prieta Earthquake

National Research Council 1994-02-01

The Loma Prieta earthquake struck the San Francisco area on October 17, 1989, causing 63 deaths and $10 billion worth of damage. This book reviews existing research on the Loma Prieta quake and draws from it practical lessons that could be applied to other earthquake-prone areas of the country.

The volume contains seven keynote papers presented at a symposium on the earthquake and includes an overview written by the committee offering recommendations to improve seismic safety and earthquake awareness in parts of the country susceptible to earthquakes.

Tactical Medicine Essentials

John E. Campbell 2020-07-15

Designed for EMS and medical professionals at all levels of training, Tactical Medicine Essentials, Second Edition provides the foundation needed to become a world-class tactical medical provider (TMP). Written by an experienced team of authors from diverse backgrounds, this text covers the essential curriculum of tactical medicine, including tactical patient assessment, expedient extrication and evacuation, and self-defense skills. The Second Edition thoroughly prepares medical professionals to safely accompany a SWAT unit into the tactical environment. Current, State-of-the-Art Medical Content for the Tactical Environment The rapidly changing tactical environment requires specialized rapid assessment techniques. The tactical patient assessment process is presented in a single, comprehensive chapter, ensuring that students understand how to rapidly apply this specialized process to the patient in the tactical environment. Each traumatic injury chapter further reinforces the tactical patient assessment process by highlighting the unique aspects of each traumatic injury. A new chapter about active assailant mass casualty incidents has been added. Law enforcement education topics for TMPs are compiled in a new appendix. Dynamic Features These features allow EMS and medical professionals to take the extra step toward becoming outstanding TMPs: • At the Scene Advice from experienced TMPs on how to excel during a mission • Safety Information on how to remain safe in the tactical environment, even under the threat of violence • Medical Gear Tips on the best equipment to pack and utilize in the tactical environment • Detailed Step-by-Step Skill Reviews A thorough discussion of how to perform lifesaving skills in the high-intensity tactical environment

Disaster Mental Health Services

Diane Garaventa Myers 2005

Disaster mental health is a growing field of practice designed to help victims and relief workers learn to effectively cope with the extreme stresses they will face in the aftermath of a disaster. The goal of disaster mental health is to prevent the development of long-term, negative psychological consequences, such as PTSD. This book assists clinicians and traumatologists in "making the bridge" between their clinical knowledge and skills and the unique, complex, chaotic, and highly political field of disaster. It combines information from a vast reservoir of prior research and literature with the authors' practical and pragmatic experience in providing disaster mental health services in a wide variety of disasters.

Working Fire

Zac Unger 2005-02-01

The author chronicles his journey from Ivy League graduate to dedicated firefighter and paramedic, discussing his training, the moments of triumph and tragedy,
the harrowing and hilarious calls, and his passion for his work.
